

# Rizki Darmawan

Full Stack Developer

[rizdar.contact@gmail.com](mailto:rizdar.contact@gmail.com) | Ciputat, South Tangerang, Indonesia

## PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience delivering scalable web applications for government and private sector clients. Proficient in modern frontend technologies (React.js, Next.js) and backend development (Node.js, Express.js, NestJS, PostgreSQL). Experienced in end-to-end application development, from database design to user interface implementation. Well-versed in the software development life cycle (SDLC) and Agile methodologies, with a strong emphasis on collaboration, clear communication, and delivering solutions that align with business objectives.

## WORK EXPERIENCE

### Full Stack Developer at PT. Giat Inovasi Teknologi

July 2025 – December 2026

#### Overview

Developed and maintained multiple full-stack web applications for government and private sector clients, delivering scalable solutions using modern technologies including Next.js, NestJS, Laravel, PostgreSQL, and Docker.

#### Key Responsibilities

- Built end-to-end web applications from initial design to deployment, handling both frontend and backend development
- Maintained and enhanced existing systems, ensuring optimal performance and reliability for production environments
- Collaborated with cross-functional teams to translate business requirements into technical solutions using Agile methodologies

#### Key Projects & Achievements

- Kementerian Pendidikan dan Kebudayaan  
Dapobud (Data Pokok Kebudayaan) : Performed system maintenance and optimization for a government cultural database application using Laravel, NestJS,

Next.js, PostgreSQL, and Docker

- AMAN (Aliansi Masyarakat Adat Nusantara)  
AMANDATA : Developed a complete web application from scratch using Next.js, PostgreSQL, and Prisma to support indigenous community data management
- PT Surveyor Indonesia  
GMS (Management Project System): Built a full-featured project management application from the ground up using Next.js, PostgreSQL, and Prisma •  
Lembaga Sensor Film (LSF)
- e-SIAS (Sistem Informasi Administrasi Penyensoran): Contributed to UI/UX development by creating interactive mockups and prototypes using Next.js for an electronic censorship administration system

### **Freelance Full Stack Developer**

October 2023 – June 2025

#### **Overview**

Delivered custom web solutions for diverse clients including government agencies and private companies, specializing in full-stack development with a focus on complex data management, real-time systems, and user-centric applications.

#### **Key Responsibilities**

- Designed and developed full-stack web applications tailored to specific client requirements and business objectives
- Implemented complex database queries and business logic to support critical operations and reporting systems
- Collaborated directly with clients to gather requirements, provide technical consultation, and ensure timely project delivery

#### **Key Projects & Achievements**

- PT Mitra Distribusi Utama  
MDU Chatbot System: Built a 24/7 customer complaint management system using Next.js and Prisma, featuring complex KPI calculations and query optimization for customer service performance tracking. Ensured system reliability for continuous operation handling real-time customer interactions
- TNP2K (Tim Nasional Percepatan Penanggulangan Kemiskinan)

TNP2K app : Redesigned and enhanced the user interface for a government poverty alleviation platform using Laravel, improving user experience and accessibility

- **BIANGREKLAME**

Developed a complete UMKM (small business) website from scratch using HTML and Bootstrap for advertising and promotional purposes, delivering a responsive and user-friendly solution

## **Software Quality Assurance at PT Medlinx Asia Teknologi**

April 2023 – October 2023

### **Overview**

Ensured the quality and reliability of IziDok, a medical records management application, through comprehensive testing and quality assurance processes. Worked closely with development teams to maintain high standards of software functionality and user experience in the healthcare technology sector.

### **Key Responsibilities**

- Developed and executed comprehensive test scenarios to ensure the functionality and reliability of the IziDok medical records application
- Conducted thorough testing and debugging to identify and resolve issues before release, ensuring compliance with healthcare data standards
- Collaborated with cross-functional teams to ensure seamless integration of features and timely project delivery

### **Key Achievements**

- Successfully maintained quality standards for a critical healthcare application handling sensitive medical records data
- Implemented systematic testing procedures that reduced bug reports in production environments
- Contributed to the continuous improvement of the QA process, enhancing team efficiency and product stability

## **EDUCATION**

Bachelor of Informatics Engineering

Universitas Pamulang

## **TECHNICAL SKILLS**

Frontend Development : React Js, NextJs, Vue Js, React Native

Backend Development : Express Js, Nest JS, Laravel

Database : PostgreSQL, MySQL

Other Technologies : Docker, Redis, GIT

## **LANGUAGES**

Indonesian: Native

English: Professional Working Proficiency

## **PERSONAL INFORMATION**

Date of Birth: March 30, 1996

Availability: Immediate

Location: Ciputat, South Tangerang, Indonesia
